

AKSHAY SURESH

Aspiring Penetration Tester

Kerala, India | +91 6282378426 | akshaysuresh441@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Aspiring Penetration Tester with hands-on experience in web application security testing, both in freelance engagements and controlled security labs. Proficient in Burp Suite, Nmap, Wireshark, SQLmap, and Python, with a strong grounding in the OWASP Top 10, reconnaissance, and vulnerability assessment. Holds a Bachelor's degree in Computer Applications and is currently pursuing industry-recognized certifications (CEH, PenTest+, CICSA).

SKILLS

Security Tools: Burp Suite, Nmap, SQLmap, Kali Linux, Splunk, Wazuh

Web Security: OWASP Top 10, Web Application Security Testing, Vulnerability Assessment, Reconnaissance

Programming & Scripting: Python, PHP, JavaScript, Bash

Systems & Networking: Linux, TCP/IP, DNS, HTTP/HTTPS

Tools & Platforms: Git, GitHub, VS Code

PROFESSIONAL EXPERIENCE

Security Tester (Freelance) | *NoteUndo*

Jul 2026 – Present

Engaged as a freelance security tester for NoteUndo, a startup with a 30-member team.

- Performed black-box security testing of NoteUndo's waitlist application, covering API endpoints, input validation, business logic, rate limiting, email verification, and token security.
- Identified security vulnerabilities and documented findings with clear, actionable remediation recommendations for the development team.
- Collaborated directly with the development team to communicate risk severity and verify fixes.

Cybersecurity Trainee | *Srishti Campus*

Jul 2025 – Aug 2025

- Completed a one-month intensive training program in cybersecurity and networking fundamentals.
- Built foundational Python-based security tools, including a custom port scanner.
- Gained hands-on exposure to Linux administration, core networking concepts, and cybersecurity principles.

PROJECTS

RedTeam-Lab-Writeups — [GitHub](#)

- Documented hands-on penetration testing, vulnerability analysis, and CTF writeups from authorized cybersecurity training labs.
- Covered web application security, exploitation, reconnaissance, and steganography techniques.

Active-Directory-Attack-Lab — [GitHub](#)

- Built a simulated enterprise Active Directory lab to demonstrate Kerberos attacks, credential abuse, lateral movement, and privilege escalation.
- Covered Kerberoasting, AS-REP Roasting, Pass-the-Hash, ACL abuse, and DCSync/Golden Ticket attacks, with blue-team detection and remediation notes.

Splunk-SIEM-Home-Lab — [GitHub](#)

- Configured a Splunk Universal Forwarder on a Kali Linux endpoint to forward authentication logs to a centralized Splunk SIEM.
- Simulated SSH brute-force attacks and validated detection through log indexing, search, and alerting.
- Tech Stack: Splunk, Kali Linux, Splunk Universal Forwarder.

PhishGuard — [GitHub](#)

- Built a full-stack Django web app that detects phishing emails in real time using a trained Logistic Regression ML model.
- Implemented auto-blocking of phishing senders, sentiment analysis, and a complete email workflow with an admin panel.
- Tech Stack: Python, Django, scikit-learn.

EDUCATION

Bachelor of Computer Applications (BCA)

2023 – 2026

Mahatma Gandhi University (MGU), Kottayam

CERTIFICATIONS

- Google Cybersecurity Professional Certificate — Google (Apr 2026)
- CICSA — Red Team Hacker Academy (In Progress)
- Certified Ethical Hacker (CEH) Master — EC-Council (In Progress)
- CompTIA PenTest+ — In Progress
